2. Catalog & Transform

AWS Glue crawlers for ETL jobs and Catalog to build tables.

3. Govern & Secure

AWS Lake Formation to manages permissions.

4. Query & Analyze

AWS Athena used to query data for BI.

2024 Performance Overview

$88k

Top Performing Month

January set the peak for the year, driving $20,000 in revenue across all four regions, highlighting a strong start to the year.

Regional Sales Performance

The Northern region is our top revenue driver. The Western region shows significant potential for growth.

Revenue by Product Category

Electronics is the clear revenue leader at $24k. The Fashion category represents a key area for promotional focus.

Key Insight: Volume vs. Value

Grocery (High Volume)

The Grocery category drives the *maximum quantity* of individual orders, indicating high customer frequency and essential-use patterns. This is our volume leader.

Electronics (High Value)

The Electronics category drives the *maximum revenue* ($24k), indicating high-margin, high-value purchases. This is our value leader.

Key Revenue Drivers

Order Quantity: Our regression model confirms that the *quantity* of items per order is the primary driver of total revenue.

Unit Price: *Unit **price*** is the second most significant factor, highlighting the importance of our high-value product categories.

Strategic Implication: Promote high-value items (price).

Quantity Forecast (2025)

Our forecast model (based on 2024 trends) predicts a significant increase in quantity, peaking in March 2025.

Strategic Recommendations

Targeted Marketing

Focus marketing campaigns in low-momentum months: February, July, and October.

Boost Fashion Category

Promote targeted offers and sales for products in the Fashion category to increase its revenue contribution.

Develop Western Region

Add the West region to the spotlight to raise revenue and increase order quantities.
